DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 22 is rejected under 35 U.S.C. 102(e) as being anticipated by Gilbert et al (U.S. Patent No. 6,016,311).

Gilbert discloses a method of exchanging information signals between transmitting/receiving stations (106 and 110) of a wireless communication system (FIG. 4) comprising the step of:

generating a transmission signal (a down link signal);

providing a sequencing control of defining time segments (time slots) with successive random positions, i.e., successive time slots (N1 in FIG. 3A) for the down link are randomly positioned by dynamically allocating the successive time slots (the number of time slots for the down link is randomly determined);

transmitting the transmission signal during the time segments; and

receiving from a station (110) receiving the transmission signal at least return (uplink) signal outside the time segments, i.e., the uplink signal is transmitted on uplink time slots (N2 in FIG. 3A) outside the N1.

Allowable Subject Matter

3. Claims 1-20 are allowed.

Response to Arguments

4. Applicant's arguments filed 12/04/2003 have been fully considered but they are not persuasive.

Applicant argues that the reference does not address any system or method for exchanging chronometric information.

In response to applicant's arguments, the recitation chronometric information has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone.

See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Applicant further argues that the reference fails to disclose segments within random positions. Examiner interprets the limitations as broadly as possible, i.e., the successive time slots for down link are dynamically allocated, thus the successive time slots (N1 in FIG. 3A) for the down link are randomly positioned (the number of time slots for the down link is randomly determined).

For the reasons as discussed above, Examiner believes that the claim rejection is proper.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
